

# Safety Data Sheet

#### 1. IDENTIFICATION

**Product identifier** 

Product Name Monoclonal or polyclonal antibodies proteins including lyophilized

#### Recommended use of the chemical and restrictions on use

Recommended Use Monoclonal or polyclonal antibody, single antibody labeled with fluorochrome or cocktail of

fluorescently labeled antibodies and proteins (including lyophilized) containing sodium azide

as a preservative

# Details of the supplier of the safety data sheet

Supplier Address Sysmex America, Inc. 577 Aptakisic Rd

Lincolnshire, IL 60069 USA

Company Phone Number 224-543-9500

# Emergency telephone number

**Emergency Telephone** ChemTel Inc. 800-255-3924 (North America)

1-813-248-0585 (International)

#### 2. HAZARDS IDENTIFICATION

Physical state Liquid Odor No odor

#### Classification

This chemical does not meet the hazardous criteria set forth by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200). However, this Safety Data Sheet (SDS) contains valuable information critical to the safe handling and proper use of this product. This SDS should be retained and available for employees and other users of this product.

# 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical name	CAS No	Weight-%
Sodium azide	26628-22-8	<0.099

<sup>\*\*</sup>If Chemical Name/CAS No is "proprietary" and/or Weight-% is listed as a range, the specific chemical identity and/or percentage of composition has been withheld as a trade secret.\*\*

# 4. FIRST AID MEASURES

#### **Description of first aid measures**

Eye Contact Rinse thoroughly with plenty of water for at least 15 minutes, lifting lower and upper eyelids.

Consult a physician.

**Skin Contact** Wash off immediately with plenty of water for at least 15 minutes.

**Inhalation** Remove to fresh air.

Revision Date: 22-Feb-2022

**Ingestion** Clean mouth with water and drink afterwards plenty of water.

#### Most important symptoms and effects, both acute and delayed

**Symptoms** None known.

#### Indication of any immediate medical attention and special treatment needed

Notes to Physician Treat symptomatically.

#### 5. FIRE-FIGHTING MEASURES

## Suitable Extinguishing Media

Alcohol resistant foam. Carbon dioxide (CO2). Powder. Water spray (fog). Water mist.

Unsuitable Extinguishing Media Water jet.

# **Specific Hazards Arising from the Chemical**

Harmful gases/smoke (carbon dioxide, aldehydes, carbon black, other decomposition products) can be produced during thermal decomposition at high temperatures or with insufficient combustion. The sodium azide contained may release very toxic hydrazoic acid/hydrogen azide gas in reactions with acids.

#### Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

#### 6. ACCIDENTAL RELEASE MEASURES

## Personal precautions, protective equipment and emergency procedures

**Personal Precautions**Use personal protective equipment as required.

**Environmental precautions** 

**Environmental precautions** See Section 12 for additional Ecological Information.

# Methods and material for containment and cleaning up

**Methods for Containment** Prevent further leakage or spillage if safe to do so.

Methods for Clean-Up Spilled product should be covered with suitable (non-flammable) absorbing material (sand,

diatomaceous earth, earth and other suitable absorption materials); to be contained in well closed containers and removed as per Section 13. Collected material should be disposed of in accordance with locally valid regulations. Upon an escape of large quantities of the product, inform the Fire Department and the Environmental Department of the Municipal Authority with extended scope of competencies. After removal of the product, wash the contaminated site with plenty of water or another suitable cleaning material. Do not use

solvents.

# 7. HANDLING AND STORAGE

# Precautions for safe handling

Advice on Safe Handling Handle in accordance with good industrial hygiene and safety practice.

## Conditions for safe storage, including any incompatibilities

Storage Conditions Store in tightly closed containers in cold, dry and well ventilated areas designated for this

purpose. Do not expose to sunlight.

**Incompatible Materials** 

Protect against strong acids, bases and oxidizing agents. Thereby a dangerous exothermic

Revision Date: 22-Feb-2022

reaction will be prevented.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### **Exposure Guidelines**

Chemical name	ACGIH TLV	OSHA PEL	NIOSH IDLH
Sodium azide	Ceiling: 0.29 mg/m³ Sodium azide	(vacated) S*	Ceiling: 0.1 ppm HN3
26628-22-8	Ceiling: 0.11 ppm Hydrazoic acid	(vacated) Ceiling: 0.1 ppm HN3	Ceiling: 0.3 mg/m <sup>3</sup> NaN3
	vapor	(vacated) Ceiling: 0.3 mg/m <sup>3</sup>	
		NaN3	

#### Appropriate engineering controls

**Engineering Controls** Follow usual measures for health protection at work and especially for good ventilation.

> This can be achieved only by local suction or efficient general ventilation. If exposure limits cannot be observed in this mode, suitable protection of airways must be used. Do not eat, drink and smoke during work. Wash your hands thoroughly with water and soap after work

and before breaks for a meal and rest.

# Individual protection measures, such as personal protective equipment

**Eye/Face Protection** Protective goggles or face shield (based on the nature of the work performed).

**Skin and Body Protection** Hand protection: Protective gloves resistant against the product. Observe

> recommendations of the particular manufacturer of the gloves in the choice of their appropriate thickness, material and permeability. Use barrier creams for skin protection, they should however not be applied once exposure has occurred. Observe other

recommendations of the manufacturer. Other protection: Protective antistatic clothing made

of natural fibers (cotton) or synthetic fibers resistant against elevated temperatures.

Contaminated skin should be washed thoroughly.

**Respiratory Protection** Mask with a filter against organic vapors or a self-contained breathing apparatus as

appropriate if exposure limit values of toxic substances are exceeded or in a poorly

ventilated environment.

General Hygiene Considerations Handle in accordance with good industrial hygiene and safety practice.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

# Information on basic physical and chemical properties

Physical state Liquid

**Appearance** Not determined Odor No odor Color Not determined **Odor Threshold** Not determined

Values\_ Remarks • Method Property

#### 10. STABILITY AND REACTIVITY

#### Reactivity

Not reactive under normal conditions of storage and manipulation. Sodium azide has been reported to form lead or copper azide in laboratory plumbing (heavy metals) which may explode on percussion. Treatment of sodium azide with strong acids gives hydrazoic acid, which is also extremely toxic.

# **Chemical stability**

Stable under recommended storage conditions.

# Possibility of hazardous reactions

Sodium azide has been reported to form lead or copper azide in laboratory plumbing (heavy metals) which may explode on percussion.

# Conditions to Avoid

The product is stable and no degradation occurs under normal use. Protect against flames, sparks, overheating and against frost.

#### **Incompatible materials**

Protect against strong acids, bases and oxidizing agents. Thereby a dangerous exothermic reaction will be prevented.

### **Hazardous decomposition products**

Not developed under normal uses. Dangerous products are formed at high temperature and in fire, such as carbon monoxide and carbon dioxide, heavy smoke and nitrogen oxides.

#### 11. TOXICOLOGICAL INFORMATION

# Information on likely routes of exposure

**Product Information** 

**Eye Contact** Avoid contact with eyes.

**Skin Contact** Avoid contact with skin.

**Inhalation** Do not inhale.

**Ingestion** Do not ingest.

# **Component Information**

Chemical name	Oral LD50	Dermal LD50	Inhalation LC50
Sodium azide	= 27 mg/kg(Rat)	= 20 mg/kg(Rabbit)	-
26628-22-8			

# Symptoms related to the physical, chemical and toxicological characteristics

Revision Date: 22-Feb-2022

**Symptoms** Please see section 4 of this SDS for symptoms.

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

**Carcinogenicity** Based on the information provided, this product does not contain any carcinogens or

potential carcinogens as listed by OSHA, IARC or NTP.

#### **Numerical measures of toxicity**

Not determined.

# 12. ECOLOGICAL INFORMATION

#### **Ecotoxicity**

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

#### **Component Information**

Chemical name	Algae/aquatic plants	Fish	Crustacea
Sodium azide		0.7: 96 h Lepomis macrochirus mg/L	
26628-22-8		LC50	
		0.8: 96 h Oncorhynchus mykiss	
		mg/L LC50	
		5.46: 96 h Pimephales promelas	
		mg/L LC50 flow-through	

# Persistence/Degradability

Not determined.

# **Bioaccumulation**

There is no data for this product.

# **Mobility**

Not determined

#### **Other Adverse Effects**

Not determined

# 13. DISPOSAL CONSIDERATIONS

### **Waste Treatment Methods**

Disposal of Wastes Disposal should be in accordance with applicable regional, national and local laws and

regulations.

Contaminated Packaging Disposal should be in accordance with applicable regional, national and local laws and

regulations.

#### **US EPA Waste Number**
